

# Instructions for attendance for Mohs Surgery at New Cross Hospital

(Black Country & West Birmingham Mohs Service) – Block A30.

We look forward to welcoming you to the Dermatology department at New Cross Hospital in Wolverhampton (A30 block).

You are likely to be in the department all day and there are times when you will have to wait for over two hours whilst histology slides are being examined, so bring some reading material and / or your smartphone. You will be able to keep any valuables with you at all times.

You will be in a waiting room that is exclusively for our Mohs patients, along with the other patients having Mohs surgery. Please note we do not have space in the Mohs waiting room for relatives or friends to stay during the day.

We will be providing you with coffee/tea and a light lunch. There is a toilet nearby.

Please wear a collarless shirt / top or loose top and not your smartest! Please don't put on any makeup / foundation that morning. If you have a dressing near your scalp you will not be able to wash your hair for a few days so you may want to wash your hair the night before.

You will be given post-operative instructions after the procedure and may have dissolving stitches and a padded dressing.

We strongly recommend that a relative / friend takes you home rather than you driving yourself or taking public transport.

It's advisable not to plan to do any vigorous activity for at least a week after the procedure.

We are likely to want to see you again a week after the procedure to check the wound.

Finally, we know that having any surgery can be daunting, especially under local anaesthetic. Let us know when you arrive if you are feeling particularly nervous. We will do our best to make the day as pain free as possible and our nurses will be available whilst you are waiting if you need anything or have any questions. We will of course answer any questions that you might have before we start the procedure.

**The prevention of infection is a major priority in all healthcare and everyone has a part to play.**

- **Please decontaminate your hands frequently for 20 seconds using soap and water or alcohol gel if available**
- **If you have symptoms of diarrhoea and/or vomiting, cough or other respiratory symptoms, a temperature or any loss of taste or smell please do not visit the hospital or any other care facility and seek advice from 111**
- **Keep the environment clean and tidy**
- **Let's work together to keep infections out of our hospitals and care homes.**
