

# Burns Injury

Emergency Department

The prevention of infection is a major priority in all healthcare and everyone has a part to play.

- Wash your hands with soap and warm water and dry thoroughly. Use hand gel, if provided, in care facilities.
- If you have symptoms of diarrhoea and vomiting stay at home and do not visit relatives that are vulnerable in hospital or in residential care. You will spread the illness.
- Keep the environment clean and safe. Let's work together to keep it that way. Prevention is better than cure.

# Advice after a Burns Injury

- If you have superficial burns on your body, arms or legs, we will put antiseptic cream and dressings on them.
- If you have burns on your hands or feet, antiseptic cream may be applied to the burn and a plastic bag put over it.

This will allow you to still move your fingers and toes so that they don't become stiff.

The skin inside the bag may go white and soggy, but it will go back to normal when the bag is taken off.

Your wound may take a couple of weeks to heal.

## **You should ensure:**

- The burn and the applied dressing are kept clean and dry.
- You manage and relieve the pain by taking tablets such as ibuprofen or paracetamol (both available at a chemist).

## **You should not:**

- Remove the dressing

## **If you experience any of the following, seek advice from your GP or return to the Emergency Department:**

- Any fluid comes from the burn.
- You accidentally get the dressing wet.
- The burn starts to feel worse.
- You start to feel unwell or develop a high temperature.
