

Milk Steps – your guide to re-introducing cow’s milk

Nutrition and Dietetics

Introduction

This leaflet has been given to you to re-introduce cow’s milk into your child’s diet. Most children outgrow their allergy to cow’s milk and often tolerate milk in a cooked form first.

Instructions for using Milk Steps

You have been advised to re-introduce milk into your child’s diet, it is important to do this in stages to identify any reaction.

Please start re-introducing milk only when your child is well.

Try each item listed one at a time and for the duration of 3 days.

If your child tolerates one of the foods for 3 days, for example malted milk biscuits; then continue to provide this but also introduce the next item listed.

The prevention of infection is a major priority in all healthcare and everyone has a part to play.

- Please decontaminate your hands frequently for 20 seconds using soap and water or alcohol gel if available
- If you have symptoms of diarrhoea and/or vomiting, cough or other respiratory symptoms, a temperature or any loss of taste or smell please do not visit the hospital or any other care facility and seek advice from 111
- Keep the environment clean and tidy
- Let’s work together to keep infections out of our hospitals and care homes.

What should I do if my child reacts one of the foods listed?

You must stop the milk ladder and reintroduce the step / food after 2 weeks.

If you are concerned about your child's reaction to one of the steps such as rash, hives, vomiting, worsening reflux, diarrhoea or swelling of the lips / eyes / face please seek medical attention by calling your GP or 111.

Who should I contact if I have any queries regarding milk re-introduction?

If you have any queries during milk re-introduction please contact your dietitian on: 01902 695335 (Monday to Friday, 8:30am – 5:00pm).
